Professional Summary

Software Engineer with hands-on experience designing, developing, and deploying production-ready full-stack applications using Java, Spring Boot, React, TypeScript, Python, and PostgreSQL. Proficient in building scalable backend systems, secure REST APIs, Spring Security, JWT authentication, database design, Docker, CI/CD, and cloud deployment. Experienced in delivering end-to-end software solutions across project management, financial technology, and AI-powered career platforms. Seeking Software Engineer, Java Backend, or Full Stack Developer opportunities.

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, FastAPI, REST APIs, JWT

Frontend: React, React Query, Zustand, Tailwind CSS, Material UI, HTML, CSS

Databases: PostgreSQL, SQLite, H2, Flyway

Cloud & Tools: Docker, Docker Compose, GitHub Actions, Render, Vercel, Git, Maven, Vite, Postman

AI / ML: Google Gemini API, TensorFlow, Scikit-learn

Education

Vellore Institute of Technology - Andhra Pradesh, Amaravati 2022 – 2026

Bachelor of Technology in Computer Science and Engineering CGPA: 7.99/10

Tirumala Junior College, Rajahmundry 2020 – 2022

Intermediate (MPC) Score: 890/1000

Projects

WeekDays – Production-Grade Project Management Platform Java 21 | Spring Boot 3.5 | React 19 | TypeScript | PostgreSQL | Docker

- Architected a full-stack project management platform using a Spring Boot Controller-Service-Repository architecture and React 19 frontend with PostgreSQL persistence.
- Implemented stateless JWT security with refresh-token rotation, BCrypt hashing, Spring Security, and Flyway migrations for version-controlled database changes.
- Delivered Kanban workflows, bulk operations, search, calendar scheduling, analytics, and notifications with React Query optimistic updates; deployed with Docker, GitHub Actions, Render, Vercel, and Neon.

StockFlow – Real-Time Stock Market Platform Java | Spring Boot | React | WebSocket | STOMP/SockJS | FintHub API

- Developed a real-time market and paper-trading platform using Spring Boot, React, and STOMP/SockJS WebSocket streaming for live updates and portfolio views.
- Implemented Java technical-analysis algorithms for SMA, EMA, RSI, MACD, and Bollinger Bands; integrated FintHub data with rate-limit fallbacks.
- Engineered a paper-trading system with server-side trade validation, portfolio analytics, and REST APIs using PostgreSQL.

HirePilot – AI Interview and Resume Analysis Platform Python | FastAPI | React | JWT | Google Gemini | Render | Vercel

- Built and deployed an AI-powered career platform for resume uploads, ATS-style matching, mock interviews, feedback, and PDF reports.
- Integrated Google Gemini 2.5 Flash for resume-based question generation, answer evaluation, and structured improvement recommendations.
- Implemented JWT authentication, user-specific interview sessions, secure file handling, and production-ready CORS configuration for a scalable FastAPI backend.

Certifications

MongoDB Associate Database Administrator MongoDB | Jul 2025

Artificial Intelligence using Google TensorFlow SmartInternz | Aug 2024
